

4 way Joystick Controller

The **4 way Joystick Controller** is used to control remote heads and cameras and offers fully proportional, smooth on-shot moves with simultaneous control of Pan, Tilt, Zoom and Focus.

Up to 4 remote heads can be selected with the 'head select' buttons. A number of camera control functions can be accessed via the additional knobs and buttons.

The unit generates RS485 data and power for the head and camera. Data can be sent via a standard audio cable to distances of over 1km using local power for the head and camera.

Primary Controls:

Pan
Tilt
Zoom
Focus
Iris
Gain
Speed
Reverse
Head Select (1-4)
