The **BE-HD10** is a miniature HD camera with the added Bradley Engineering features of usability, connectivity and control. It is packaged in a very small unit and offers outstanding affordability.

The camera can accept standard lens converters and all functions are controlled remotely via a simple protocol. It is designed to match perfectly our **U3 Remote Head** which has all the control protocols and a PSU built in. It can also be used in a stand-alone mode or with other control systems.

The optional HDSDI board* is fitted internally and outputs HDSDI on the BNC socket.
