

## BE\_HDR70 Miniature Remote HD Camera

- **70mm Diameter Camera Head**
- **Integrated 10:1 zoom lens**
- **Small CCU box**
- **Built in microphone**
- **Tally light**
- **Standard Protocols**
- **Power-up memory function**

The Bradley Engineering **BE\_HDR70** is a very small profile remote-head HD camera for discreet and fixed camera applications. Separating some of the electronics by a 1.5m cable enables the camera head and lens to be reduced in size to only 70mm diameter by 90mm long - including the lens.

The CCU box is also very small, only 80mm x 80mm x 26mm thick. Just large enough to fit the XLR sockets. As normal with Bradley Engineering equipment, power and data are fed via a single XLR4 cable with HDS DI and audio outputs on standard XLR and BNC connectors.

The **BE\_HDR70** is also ideal for use where weight and size are major considerations such as on the end of camera poles, model sets, in-car rigs etc. Extension cables are available in 5m lengths.

Camera specifications are the same as the BE\_HD10

Dimensions:      Camera - Diameter 70mm, Length 90mm  
                          CCU - 80mm x 80mm x 26mm  
Weight:            Camera - 220gm  
                          CCU - 130gm
