

Mini Joystick Controller

- Simple & Cost Effective
- Standard Protocols
- Pan, Tilt, Zoom, Focus
- Iris, Run/Stop
- Speed Up/Down
- Reverse Pan/Tilt

The **Mini Joystick** is a simple, basic controller with the most common controls and produces standard protocol data in RS485 format via industry standard XLR connectors.

It is primarily intended to be used with a single **Z-Head** fitted with a LANC controlled camcorder but can be used with any of the Bradley Engineering remote heads or remote head drivers.

As with all our controllers, power and data are carried on a single XLR4 cable to the remote head making connection and operation very simple.

Dimensions; 190mm x 110mm x 70mm (excluding joystick)

Weight: 0.9kg

Power: 12v, 0.2A
